CPSC 411 App Store Project 1, due Wednesday, 13 Mar 2019

Your name and company name: _Jonathan Cardinale - Yarrcad_

Repository https://github.com/_Yarrcad_ /_CPSC-411-Contractor-Companion-v1_

Verify each of the following items with a corresponding checkmark. Incorrect items will incur a 5% penalty on the grade.

Complete	Incomplete	App store project 1
☑	☐	Created an innovative idea for a simple, yet compelling app. As Apple puts it, your App should do something useful, unique, or provide some form of lasting entertainment.
☑	☐	Done market research on the 4 most popular apps that are most similar to your idea. 1. _Evernote_ 2. _Wunderlist_ 3. _TodoList: Organize Your Life_ 4. _Agenda._
☑	☐	**Your app is better, faster, easier, cheaper, safer, or more fun than the apps listed above in at least three ways:** (1) _Cheaper (free)_ , (2) _Safer (no user info)_ , (3) _Better (has a timer)_ ,
☐	☑	**Design documents** (UI including View controllers, Tab bar controllers, Navigation bar controllers, widgets, frameworks), **signed off on by instructor** _Dont remember what this is supposed to be._
☑	☐	Identified the MVP (the minimum viable product) that can be tested by users, and the first few versions of improvements. List the MVP and iterations here: MVP. _Working Task Creator_ v2. _Working Calendar_ v3 _Working Salary Calculator_ v4 _Working Quarterly Tax Calculator_
☑	☐	**Set up a Trello account w/ a project plan** of tasks to be done, hours needed, & schedule
☑	☐	Using the programming techniques we have learned so far (chapters 1-15), have implemented the App so that it compiles and runs without runtime errors.
☑	☐	Invested at least **20** hours in your App. Apple says, *"If your App looks like it was cobbled together in a few days, please brace yourself for rejection."*
☑	☐	Chose and implemented the monetization strategy: <mark>none</mark>, in-app purchases, ads within the app, or premium versions that users must upgrade to for full app functionality.
☑	☐	App's UI uses space well, with constraints correctly set, on **iPhones and iPads in landscape and in portrait mode**. Do NOT restrict your App to run only in Portrait mode.
☑	☐	Met App Store's Safety, Performance, Business, Design, and Legal (data collection, use, sharing) requirements: https://developer.apple.com/app-store/review/guidelines
☐	☑	Published to App store: _____ by: _____
☑	☐	Project directory pushed to new GitHub repository listed above using GitHub client.

Your comments

I know someone mentioned in class that there was a free school apple dev account but I couldn't figure it out. I'm tight on cash and don't want to buy a dev account since I have no interest in putting this app on a resume and have plenty of experience publishing apps to the app store for my work.
